RESULTS FROM THE SPACE GENERATION FUSION FORUM ASTRONOMICAL CONCERNS
WITH SMALL SATELLITES BREAKOUT SESSION.

Abstract

This paper will report on the findings from the Space Generation Fusion Forum's recommendations and requests to the UNOOSA, US Government, and the space industry at large. This group will focus on software innovations in small satellite reduction, policy recommendations for future astronomers and small satellite operators, and findings when collaborating with indigenous most affected by this disruption in the nighttime sky. Multiple students and young professionals were part of these discussions and will present the findings.
